unfortunately [#HR](#) likes one size fits all solutions (don't want to work too hard) and there isn't one with flex [#flexworkchat](#) about 2 hours ago from [web](#)

[LisaNewkirk](#) RT [@leannecl](#):

Reading "Flexible working good for the heart & soul" <http://bit.ly/d5FMTu> in advance of [#flexworkchat](#) 11:30a w/ [@philmontero](#) about 2 hours ago from [TweetDeck](#)

[philmontero](#) Q2 So true

[@JasperWestaway](#) how do you know they are working when in the office? Most companies rely on eyeball mgmt. [#flexworkchat](#) about 2 hours ago from [TweetChat](#)

[#flexworkchat](#) about 2 hours ago from [web](#)

[oneDrum](#) There are definitely some significant barriers to consider... on to question 3 [#flexworkchat](#) [about 2 hours ago](#) from [TweetChat](#)

[farhanlalji](#) Think [@caliandjody](#) would really enjoy this tweetchat, their Results only philosophy nails this. <http://gorowe.com/> [#flexworkchat](#) [about 2 hours ago](#) from [TweetChat](#)

[BalancingProf](#) So true [@leannecl](#)! [#HR](#) likes one-size-fits-all solutions. Flex is scary for how it changes many HR things. Easier to avoid. [#flexworkchat](#) [about 2 hours ago](#) from [TweetChat](#)

[JasperWestaway](#) Q2 And when I am distracted in the office, I'm taking 3 others down with me. Flexi working firewalls employees [#flexworkchat](#) [about 2 hours ago](#) from [TweetChat](#)

[leannecl](#) Q2 anyone work with interns? Why do we give them such autonomy and not our own staff? [#flexworkchat](#) [about 2 hours ago](#) from [web](#)

[daveyank](#) [@philmontero](#) You seem like a guy who would use the "Boss" button when watching NCAA Bball tourney at work ;) [#flexworkchat](#) [about 2 hours ago](#) from [TweetChat](#)

[philmontero](#) RT

[@JasperWestaway](#): Q2 When I'm distracted in the office, Im taking 3 others down with me. Flexi working firewalls employees [#flexworkchat](#) about 2 hours ago from [TweetChat](#)

[leapingfrogs](#) For Q3 I'm interested in hearing how people maintain the 'water cooler' chat when working from home... [#flexworkchat](#) [about 2 hours ago](#) from [Tweetie](#)

[philmontero](#) Q3 Critically important: Communicate about how you are going to communicate with a virtual team or remote employees [#flexworkchat](#) [about 2 hours ago](#) from [TweetChat](#)

[BalancingProf](#) Tools depend on org. As small co., we use laptops, screen sharing tech. & shared files/calendars. Big teams may need more. [#3](#) [#flexworkchat](#) [about 2 hours ago](#) from [TweetChat](#)

[leapingfrogs](#) Typically find that there is a lot of information that spreads out that way, rather than focused conversation. [#flexworkchat](#) [about 2 hours ago](#) from [Tweetie](#)

[ldatta](#) I use IM + Wave [@leapingfrogs](#) Q3 I'm interested in hearing how people maintain the 'water cooler' chat when working from home [#flexworkchat](#) [about 2 hours ago](#) from [TweetChat](#)

[LisaNewkirk](#) RT [@leannecl](#):
Q1: Writing requires quiet for me. Cubeland not conducive...used to procrastinate more there than home [#flexworkchat](#) //YES!!

[JasperWestaway](#) Q3 Allow employees freedom in choosing tools. This is about flexibility and innovation after all [#flexworkchat](#) about 1 hour ago from [TweetChat](#)

[telesaur](#) Q3 Try using tools that people may already be using informally. [#flexworkchat](#) about 1 hour ago from [TweetChat](#)

[leannecl](#) [@leapingfrogs](#) IM, skype, co-working spaces [#flexworkchat](#) about 1 hour ago from [web](#)

[daveyank](#) [@leapingfrogs](#) For me Twitter is the world's largest virtual watercooler [#flexworkchat](#) about 1 hour ago from [TweetChat](#)

[leannecl](#) yes & no-need team to use same RT [@JasperWestaway](#) Q3 Allow employees freedom in choosing tools This is about flex & innovation [#flexworkchat](#) about 1 hour ago from [web](#)

[ldatta](#) Q3. IT must be a partner, not provider or decision-maker [#flexworkchat](#) about 1 hour ago from [TweetChat](#)

[telesaur](#) Q3 I keep toying with the idea of <http://www.ventrilo.com/> [#flexworkchat](#) about 1 hour ago from [TweetChat](#)

[Enhanced Teams](#) Q3 For a larger org - giving employees free-reign without standards can lead to huge ICT problems [#flexworkchat](#) about 1 hour ago from [Seismic](#)

[philmontero](#) I agree [@leannecl](#) IM is overlooked as an effective business communication tool. Probably use it as much or more than email [#flexworkchat](#) about 1 hour ago from [TweetChat](#)

[WorkWithIllness](#) RT [@JasperWestaway](#): Q1 People talk about work/balance but I find that when I work from home my work intensity increases [#flexworkchat](#) about 1 hour ago from [TweetDeck](#)

[leapingfrogs](#) [@leannecl](#) [@philmontero](#) Q3 agree that those tools help, but it's the spontaneous conversation that can get missed. [#flexworkchat](#) about 1 hour ago from [Tweetie](#)

[JasperWestaway](#) Q3 I think automated communication is critical. Don't

update boss. The tools should notify the boss when status changes. [#flexworkchat](#) [about 1 hour ago](#) from [TweetChat](#)

[ErikaWendt](#) Need some commonality though. RT [@JasperWestaway](#): Q3 Allow ees freedom in choosing tools. This is about flex & innovation [#flexworkchat](#) [about 1 hour ago](#) from [TweetChat](#)

[BalancingProf](#) RT [@daveyank](#) [@leapingfrogs](#) For me Twitter is the world's largest virtual watercooler [#flexworkchat](#) [#flexworkchat](#) [about 1 hour ago](#) from [TweetChat](#)

[philmontero](#) Q3 - I do think you need to standardize on a set of tools - but if possible give employees/team a voice in choosing them. [#flexworkchat](#) [about 1 hour ago](#) from [TweetChat](#)

[leannecl](#) Q3 Keep tools simple...tried basecamp at former employer - made more work for everyone when simple email updates would suffice [#flexworkchat](#) [about 1 hour ago](#) from [web](#)

[philmontero](#) YES! RT [@BalancingProf](#): RT [@daveyank](#) [@leapingfrogs](#) For me Twitter is the worlds largest virtual watercooler [#flexworkchat](#) [#flexworkchat](#) [about 1 hour ago](#) from [TweetChat](#)

[nivenjcc](#) Q3 Regular -

[#flexworkchat](#) about 1 hour ago from [web](#)

[caliandjody](#) Seeing all these
possibilities, tools, insights, etc. = adapt and
then adapt some more [#flexworkchat](#)
about 1 hour ago from [web](#)

[JasperWestaway](#) Q3
[@leannecl](#) of course, but we need to trust
employees to do that for themselves. The
best tools are then emergent
[#flexworkchat](#) about 1 hour ago from
[TweetChat](#)

[leapingfrogs](#) I guess my
watercooler Q comes down to the size of the
organisation, i.e. proportion of home/office
based. [#flexworkchat](#) smaller = easier?
about 1 hour ago from [Tweeie](#)

[daveyank](#) Q3 What??? Nobody is
using Google Wave for efficient
communication??? I kid. [#flexworkchat](#)
about 1 hour ago from [TweetChat](#)

[ErikaWendt](#) [@leannecl](#) Can
you explain basecamp? [#flexworkchat](#)
about 1 hour ago from [TweetChat](#)

[leannecl](#) [@JasperWestaway](#) yes, but we would have virtual team meetings...must have whole team using same tool at that time...[#flexworkchat](#) (like now) [about 1 hour ago](#) from [web](#)

[ldatta](#) Q3. Purpose, People, Process, Place (including tools)... by focusing on the first 3, the rest becomes easier to identify/adapt [#flexworkchat](#) [about 1 hour ago](#) from [TweetChat](#)

[philmontero](#) Q3 - Sandbox time is important to get people comfortable with tools. Find fun ways to engage with your technology - informal [#flexworkchat](#) [about 1 hour ago](#) from [TweetChat](#)

[leannecl](#) [@ErikaWendt](#) Basecamp was a project management tool - would put projects in, assign tasks and update in it - lots of data entry [#flexworkchat](#) [about 1 hour ago](#) from [web](#)

[JasperWestaway](#) Q3 [@daveyank](#) the interesting thing is that [#googlewave](#) clearly struck a note with people, it just disappointed many [#flexworkchat](#) [about 1 hour ago](#) from [TweetChat](#)

[workengagement](#) I agree that simple, generic communication works best. Special software demands more learning than new functions justify. [#flexworkchat](#) [about 1 hour ago](#) from [web](#)

[leapingfrogs](#) .. i.e. large %age working offsite leads to greater use of online tools to support vs many in office being more word of mouth. [#flexworkchat](#) [about 1 hour ago](#) from [Tweeie](#)
